II. INTRODUCTION

A. Introduction:

1. Emergencies can occur anytime-anywhere. Violence can happen even in an environment dedicated to children and families. We must ensure that our staff, children and families are prepared to effectively handle a wide range of dangerous situations to continue to provide a safe environment where learning a can occur.
2. A comprehensive site Emergency Response Plan must be developed and all staff members trained in order to effectively respond during emergencies.

B. Purpose:

1. This plan is designed to providing practical guidelines to enable staff to properly prepare and respond to a wide range of emergency and disaster situations. In any emergency situation, the Head Start / Early Head Start program's overriding mission is to:
 - a. Protect life.
 - b. Secure the facilities and infrastructure.
 - c. Resume program operations.
 2. This plan will provide step-by-step guidelines to help deal with emergencies that may occur. Planning, preparation, and training will help staff personnel learn the proper courses of action to take during an emergency. This plan cannot foresee all possible circumstances of an emergency. Staff must be prepared to evaluate all the circumstances and make sound judgments based on the situation. This plan should address three key areas to ensure plan / response effectiveness:
 - a. Personnel--who is assigned to do what. Personnel will be assigned to one of Emergency Response Groups that make up the Emergency Response Team. Emergency Response Groups are identified in Appendix A.
 - b. Training--who is trained to do what. All personnel will be trained to accomplish their assigned duties. A training matrix listing all personnel and completed training will be identified in Appendix B.
 - c. Equipment--what equipment is needed for training and response. A list of equipment need for both training and response will be maintained. All equipment will be documented as on-hand or identified as a shortfall in Appendix C.
- Drills will be conducted periodically to test the effectiveness of the plan. A debriefing shall be conducted after each drill to receive feedback from all participants on the effectiveness of the plan. Identified weaknesses will be addressed to strengthen the plan. Drills conducted shall be documented on the Drill Log in Appendix D.
 - Each classroom will be supplied with a classroom Emergency Response Procedures Guide; section IV of this plan that provides instructions on how to respond to specific events as determined by the site emergency planning committee.

III. BASIC PLAN

A. Situation:

1. The center sits on at [826 N. Divide St.]. The site consists of [1] buildings. There is an Average Daily Membership of [20 children] and [4] staff members. Hazards of the center grounds buildings and surrounding community includes High Pressure Pipelines.
2. The Head Start Director / Executive Director have the primary responsibility for developing and implementing the site Emergency Response Plan and executing Head Start policies.
3. Site personnel and / or local fire and law enforcement agencies handle most site emergencies.

B. Assumptions:

- a. During an emergency, centralized direction and control [i.e., senior staff] is the most effective approach to management of emergency operations.
- b. In case of an emergency that is beyond the capabilities of the site to handle, site personnel will coordinate with local emergency response agencies. This may include having a member or members act as liaison with responding agencies.

C. Command and Communications:

1. The order of succession for the Head Start / Early Head Start emergency response program is:
 - The Head Start / Early Head Start Director
 - The Education Manager
 - Health Manager and Facilities Manager
 - Site Supervisor
 - *If the director is unavailable, the next individual must assume incident command.
2. When an emergency condition exists, Site Supervisor will notify the necessary personnel to respond to their area of assignment. The methods of communication listed below in descending order will be used with "a" being the primary mode of communication followed by alternative modes.
 - a. Telephone
 - b. Messenger

D. Staff Response Roles:

1. How a program manages and responds to a crisis greatly affects the public's perception of the organization.
2. The County Judge (Judge Charlie Bradley) may make a Declaration of a State or Local Emergency for a disaster or potential disaster in Schleicher County. The declaration would be issued from the Emergency Operations Center.
3. Advisories for internal disasters would be issued by the Head Start / Early Head Start Director, Education Manager, or Health and Facilities Manager. If none of the preceding is present, the Site Supervisor in charge at any program site may declare an emergency and then promptly notify the appropriate Management Team member. The agencies Emergency Response Team will consist of three groups:

a. The Administrative Group consists of the Director / Executive Director and office staff that provides the support framework for the Agency. This group is responsible for:

1. Emergency Response Plan Oversight
2. Incident Command
3. Public Relations
4. Human Resources
5. Media / Information Release
6. Finance
7. Long Term Recovery

b. The Support Group includes individuals that provide support to teachers and students such as food service, maintenance and safety personnel. This group may include parents and volunteers and is responsible for:

1. Food Service
2. Site Safety
3. Building Operations
4. Transportation
5. Short Term Mitigation

c. The Teachers Group consist of those whose daily duties involves direct care for the students. This group is responsible for:

1. Providing / Receiving Information
2. Student Accountability
3. Classroom Security
4. Classroom Evacuation

4. In the event of an emergency all staff persons are to assume responsibility for the following actions:

1. Initiation of steps to safeguard the children, staff and property
2. Notification of authorities and center staff
3. Initiation of steps to mitigate or contain the situation
4. Implementation of evacuation procedures

5. In addition, the Director / Executive Director of Head Start / Early Head Start (or designee) will assume the role of Site Supervisor for all emergencies and or disasters.

E. Debriefing:

Because the demands of responding to a crisis are intense and place staff under a great deal of stress, it is advisable to engage staff in a “debriefing”. This process should be undertaken with a trained professional. The debriefing allows staff an opportunity to express feelings and receive emotional support. For others, it provides the opportunity to learn and to become better prepared for crisis.

F. Deactivation:

When emergency conditions are stabilized and normal program operations can resume, the Head Start / Early Head Start Director will deactivate the Crisis / Emergency Plan. A formal announcement will be disseminated. If the nature of the incident requires an extension of some emergency services, special work groups may be appointed to coordinate those continuing activities, which may include:

1. Ongoing repairs,
2. Space re-assignments or adjustments,
3. Support services for children, staff and parents,
4. Community relief efforts,
5. Cost recovery (develop cost and loss documentation forms).

Immediately following the end of an emergency or crisis, a survey of the Emergency Team members and involved staff will be conducted to evaluate the effectiveness of the response. Survey results will help determine whether portions of the Emergency Plan must be modified due to the crisis event. The Head Start / Early Head Start Director in conjunction with the Management Team will prepare a written “Crisis Summary Report” analyzing post-event observation, and will coordinate appropriate plan revisions (this also applies to weather related crisis situations).

G. Recovery

After dealing with the stress and trauma involved in a crisis, it is important to note that the initial crisis may be resolved, but many ancillary issues may still exist. The recovery phase is an important time to deactivate the plan, reassess the effectiveness of the efforts, and evaluate the program’s ability to conduct normal business.

- All people assume the **duck, cover and hold** position on the ground.
- Shut down all utility systems to the building. (Gas and electricity are the priorities)
- Shelter in place to protect from fall out if attack is far enough away.
- Keep students and staff inside buildings. Allow parents to pick up their children at their own discretion once cleared to do so by public safety, emergency management, or military authorities

Biological:

Defense against biological attacks is difficult. Awareness of an attack is usually not possible for days or weeks. The first signs may emerge as personnel notice a higher than usual incidence of various symptoms. Should an attack be discovered while in progress the center should:

- Reverse-evacuate all people into center buildings.
- Shelter in place. **(Do not use basements or low lying areas)**
- Close all doors and windows.
- Shut down the HVAC system. (Limit airflow from outside)
- Seal doors, windows, and vents with plastic and duct tape.
- Keep students and staff inside buildings. Allow parents to pick up their children at their own discretion once cleared to do so by public safety, emergency management, or military authorities.

Chemical:

- Reverse-evacuate all people into center buildings.
- Shelter in place. **(Do not use basements or low lying areas)**
- Close all doors and windows.
- Shut down the HVAC system. (Limit airflow from outside)
- Seal doors, windows, and vents with plastic and duct tape.
- Be prepared to treat students and staff who experience a reaction to the chemical agent.
- The decision to evacuate should be made after consulting with public safety, emergency management, or military authorities.

Conventional:

The danger from the blast effect of conventional explosive devices is similar to nuclear devices with a higher rate of survivability. If responding to the threat of a imminent blast nearby:

- Move students and staff to specifically identified basement or lower level rooms. Interior hallways may be used as an alternate.
- Close all doors leading into hallways to minimize flying glass.
- All people assume the *duck, cover, and hold* position on the ground.
- Shut down all utility systems to the building. (Gas and electricity are the priorities)
- Shelter in place to protect from fall out if attack is far enough away.
- Keep students and staff inside buildings. Allow parents to pick up their children at their own discretion once cleared to do so by public safety, emergency management or military authorities

If the center is the target:

- Evacuate to pre designated off site location(s)

R. WEAPONS

- Accompany suspect to private office to wait for police.
- Conduct search with police.
- Keep detailed notes of all events and why search was conducted.
- Notify parent(s) or guardian(s) if suspect is a student. Explain why search was conducted and results of the search.
- If suspect threatens you with a weapon, do not try to disarm them. Back away with your arms up. Remain calm.

E. SITE PLAN REVIEW

Each center site emergency response plan must be reviewed at least once each year. It is recommended that this review be conducted prior to the start of each center year. Additionally, the plan must be reviewed anytime weaknesses in the plan are identified during a drill, exercise or an actual emergency event. Centers should include their local emergency response, emergency management and public health agencies in the review process.

<input type="checkbox"/>	Review plan for compliance with the Head Start, State and local requirements. Identify and report deficiencies.
<input type="checkbox"/>	Review existing emergency procedures. Are the procedures adequate to address identified hazards / threats? Identify and report new hazards / threats developed that should be added.
<input type="checkbox"/>	Review Emergency Team Assignments and responsibilities, update as needed. Identify and report team shortfalls.
<input type="checkbox"/>	Review Training matrix to ensure training of all assigned tasks. Identify and report all training shortfalls.
<input type="checkbox"/>	Review Equipment List; verify on-hand equipment condition; identify and report all equipment shortfalls.

G. INFLUENZA PLANNING

A pandemic is a global disease outbreak. A flu pandemic occurs when a new influenza virus emerges that people have little or no immunity to and for which there may be no vaccine. The disease spreads easily person to-person and causes serious illness. It can sweep across the country and around the world very quickly. It is hard to predict when the next flu pandemic will occur or how bad it will be.

Child care and preschool programs can help protect the health of their staff and the children and families they serve. Interruptions in child care services during an influenza (flu) pandemic may cause conflicts for working parents that could result in high absenteeism in workplaces. Some of that absenteeism could be expected to affect personnel and workplaces that are critical to the emergency response system. The U.S. Department of Health and Human Services (HHS) and the Centers for Disease Control and Prevention (CDC) offer this checklist to help programs prepare for the effects of a flu pandemic. Many of these steps can also help in other types of emergencies. More information on pandemic flu is available at www.pandemicflu.gov.

1. Planning and Coordination:

- Form a committee of staff members and parents to produce a plan for dealing with a flu pandemic. Include members from all different groups your program serves. Include parents who do not speak English who can help contact other non-English speakers in the community. Staff of very small programs might consider joining together with other similar programs for planning.
- Assign one person to identify reliable sources of information and watch for public health warnings about flu, school closings, and other actions taken to prevent the spread of flu.
- Learn who in your area has legal authority to close child care programs if there is a flu emergency.
- Learn whether the local / state health departments and agencies that regulate child care have plans. Be sure your flu plan is in line with their plans. Tell them if you can help support your community's plan.
- Identify all the ways a flu pandemic might affect your program and develop a plan of action. (For example, you might have problems with food service, transportation, or staffing.)
- Encourage parents to have a "Plan B" for finding care for their children if the program is closed during a flu pandemic. Give them ideas about where they might seek help based on your knowledge of the local child care community.
- Work with those in charge of your community's plan to find other sources of meals for low-income children who receive subsidized meals while in your care. (For example, locate food pantries and meals on wheels.)
- Learn about services in your area that can help your staff, children, and their families deal with stress and other problems caused by a flu pandemic.
- Stage a drill to test your plan and then improve it as needed. Repeat the drill from time to time.
- Consider volunteering to help in tests of community plans.
- Talk to other child care and preschool programs in your area to share information that could make your plan better. Discuss ways programs could work together to produce a stronger plan and pool resources.

2. Student Learning and Program Operations:

- Plan how you would deal with program closings, staff absences, and gaps in student learning that could occur during a flu pandemic.
- Plan ways to help families continue their child's learning if your child care program or preschool is closed. (For example, give parents things they can teach at home. Tell them how to find ideas on the internet. Talk with child care resource referral agencies or other groups that could help parents continue their children's learning at home.)
- Plan ways to continue basic functions if your program is closed. (For example, continue meeting payroll and keeping in touch with staff and student's families.)

3. Communications Planning:

- Have a plan for keeping in touch with staff members and students' families. Include several different methods of contacting them. (For example, you might use hotlines, telephone trees, text messaging, special Websites, local radio and / or TV stations.) Test the contact methods often to be sure they work.
- Make sure staff and families have seen and understand your flu pandemic plan. Explain why you need to have a plan. Give them a chance to ask questions.
- Give staff and students' families reliable information on the issues listed below in their languages and at their reading levels.
- How to help control the spread of flu by hand washing / cleansing and covering the mouth when coughing or sneezing. (See [www.cdc.gov / flu / school / .](http://www.cdc.gov/flu/school/))
- How to recognize a person that may have the flu, and what to do if they think they have the flu. (See [www.pandemicflu.gov.](http://www.pandemicflu.gov/))
- How to care for ill family members. (See [www.hhs.gov / pandemic flu / plan / sup5.html#box4.](http://www.hhs.gov/pandemicflu/plan/sup5.html#box4))

Concho Valley Council of Governments Head Start

Appendix 1 Active Shooter Response Plan

CONCHO VALLEY
COUNCIL OF GOVERNMENTS

Updated July 2017

For Official Use Only

ACTIVE SHOOTER

Upon recognizing the danger, as soon as it is safe to do so, staff or others must alert responders by contacting 911 with as clear and accurate information as possible. As the situation develops, it is possible that students and staff will need to use more than one option.

During an active shooter situation, staff will rarely have all of the information they need to make a fully informed decision about which option is best. While they should follow the plan and any instructions given during an incident, often they will have to rely on their own judgment to decide which option will best protect lives.

Run

If it is safe to do so for yourself and those in your care, the first course of action that should be taken is to run out of the building and far away until you are in a safe location.

- Leave personal belongings behind;
- Visualize possible escape routes, including physically accessible routes for students and staff with disabilities as well as persons with access and functional needs;
- Avoid escalators and elevators;
- Take others with you, but not to stay behind because others will not go;
- Call 911 when safe to do so

Hide

If running is not a safe option, hide in as safe a place as possible. In addition:

- Lock the doors;
- Barricade the doors with heavy furniture;
- Close and lock windows and close blinds or cover windows;
- Turn off lights;
- Silence all electronic devices;
- Hide along the wall closest to the exit but out of the view from the hallway (allowing for an ambush of the shooter and for possible escape if the shooter enters the room);
- Use strategies to silently communicate with first responders if possible; and
- Remain in place until given an all clear by identifiable law enforcement officers.

Students and staff should be trained to hide in a location where the walls might be thicker and have fewer windows.

Fight

If neither running nor hiding is a safe option, as a last resort when confronted by the shooter, adults in immediate danger should consider trying to disrupt or incapacitate the shooter by using aggressive force and items in their environment, such as fire extinguishers, and chairs.

NOTIFICATION

The primary consideration under any school related emergency shall be the safety, welfare and health of the students.

1. It is essential that parent/guardian inform staff of any contact information changes as soon as they occur. Information is required to be kept up-to-date in case of emergencies.
2. Under emergency situations, parent/guardian will be contacted as soon as practical and safe via messenger system or phone.
3. If the child is released to emergency personnel:
 - Staff will obtain the emergency personnel's information (name, agency they work for and vehicle number or license plate)
 - Where the child is being taken to
 - Notify parent/guardian listed on the child's emergency information
 - Complete Incident Report

Emergency Documents and Resources

The teacher will have these items with him/her in every emergency situation or practice drill -- Evacuation, Shelter-in, and Lock-Down.

- Daily sign-in sheet
- Up-to-date family contact information
- Authorization for emergency care for each child.
- Medical information on children, as appropriate (e.g., special needs)
- Emergency Backpack

These items must be quickly available.
